TD FRESH IMPRESSION

ABOUT OUR CLEANING PRODUCTS

We care deeply about our clients and the environment at TD Fresh Impression. Transparency is essential to us, so we openly share the quality cleaning products we use in your home.

Our team follows a "less is better" approach, prioritizing eco-friendly and non-toxic products whenever possible. However, we recognize that achieving the pristine cleanliness we provide sometimes requires stronger solutions to tackle bacteria, mold, and other stubborn contaminants.

We continually research and test new products to ensure we deliver top-tier results with the least environmental impact. We also proudly incorporate Norwex products, which use high-quality microfiber and natural antibacterial properties to reduce the need for chemical cleaners while still delivering a deep, effective clean.

If you have sensitivities to specific products or prefer to provide your own cleaning solutions, we are happy to accommodate your requests.

We proudly use Dyson Ball vacuums, known for their powerful suction and advanced filtration system, ensuring a thorough clean in every space. We maintain and prefer to use our own vacuums whenever possible. If you want to use your vacuum, it must be in good working order. Please note that we do not service or troubleshoot client-owned vacuums. Additionally, if pets regularly have accidents in your home, we require the use of your vacuum for hygiene purposes.

To make your experience effortless, we provide all the necessary cleaning tools to service your property. At TD Fresh Impression, our goal is to leave every space feeling fresh, spotless, and revitalized — while making eco-conscious choices whenever possible.
